J.S. Patent and Trademark Office PTO-326 (Rev. 04-01) Offic	ce Action Summary	Part of Paper No. 4

Application/Control Number: 09/940,114

Art Unit: 1731

- 1. The abstract of the disclosure is objected to because it is not directed to the claimed invention (i.e. the method). Further, it does not recite the steps of the claimed method.

  Correction is required. See MPEP § 608.01(b).
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 406051679 in view of Valyi (5,082,604).

JP 406051679 teaches the basic claimed process of manufacturing a magnet roller by injection molding a magnetic powder/binder mixture into the cavity of a mold while applying a

Application/Control Number: 09/940,114

Art Unit: 1731

magnetic field thereto. JP 406051679 also discloses the magnet roller has a JIS surface roughness of 10.

JP 406051679 does not disclose the specific configuration of the injection mold.

Valvi discloses an injection mold comprising a fixed mold having a cavity and a moveable mold disposed in the cavity and capable of increasing or decreasing a volume of the cavity, and discloses moving the moveable mold during injection such that the volume of the cavity is increased in accordance with the amount of injected material. Valyi also discloses that the use of this type of mold avoids defects due to shrinkage. Valyi also discloses the moveable mold moves in a lengthwise direction of the cavity against a biasing force provided by a biasing means extending in the cavity. It would have been obvious to one having ordinary skill in the art at the time of the invention to use this type of mold in the process of JP 406051679 in view of the generic disclosure therein in order to obtain a product having reduced defects due to shrinkage.

Determination of the specific injection pressure and biasing force would have been well within the realm of routine experimentation to one having ordinary skill in the art at the time of the invention. These parameters would have obviously been selected to optimize the process conditions and/or the properties of the final product.

Application/Control Number: 09/940,114

Art Unit: 1731

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher A. Fiorilla whose telephone number is 703-308-0674. The examiner can normally be reached on M-F, 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P. Griffin can be reached on 703-308-1164. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7718 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
